

Organizer: *Innovative Cardiovascular Initiative*

INNOVATIVE 2025 CARDIOVASCULAR INITIATIVE SUMMIT

Oct | Sat
4

09:00 – 17:00

Charles K. Kao Auditorium,
Hong Kong Science Park

● Session 1: Next Generation Intracoronary Imaging

- i. Unveiling Vulnerable Plaque: The Role of NIRS-IVUS
- ii. A New Frontier in Cardiovascular Imaging: NIRS-OCT
- iii. Innovation Insights: The Hybrid IVUS/OCT Catheter
- iv. Advancing CTO Interventions: The Role of Dedicated CTO IVUS Catheter
- v. Breakthrough Technology: Deep OCT for Enhanced Coronary Imaging

● Session 2: From Imaging to Physiology

- i. Angiographic Derived Physiology and Plaque Vulnerability
- ii. Comprehensive Insights: Combining Morphology and Physiology in Coronary Assessment with OCT
- iii. Beyond the Culprit: Exploring AngioFFR in Non-Culprit Lesions

● Session 3: Innovation in Cardiac Computer Tomography

- i. Revolutionizing Coronary Imaging: The Role of Photon Counting CT
- ii. State of the Art-Computer Tomography Guided PCI
- iii. How Does Artificial Intelligence Improve CT-FFR

INAUGURATION CEREMONY **for Innovative Cardiovascular Initiative**

● Session 4: AI Use in Cardiac Imaging

- i. Coronary Revascularization in 2040
- ii. Next Generation Artificial Intelligence Intra-Coronary Imaging (OCT/IVUS) Analysis
- iii. Smart Analysis: AI QCA in Coronary Artery Lesion Evaluation

● Session 5: Novel Technologies in Coronary Imaging Case Competition
